# MALE FERTILITY • MFS

D I E T A R Y   S U P P L E M E N T

## *Improved Formula*

New Components Include

Acetyl-L-Carnitine

Glutathione

L-Methionine

Lycopene

Relora®

120 Vegetable Capsules  
Made in U.S.A.

## Coast MFS • Male Fertility Supplement

*From the People Who Brought You Fertile One® for Men*

The *Coast Male Fertility Supplement (MFS)* is developed to improve sperm motility (movement), sperm morphology (shape), sperm concentration (count), and decrease sperm DNA fragmentation (cellular).†

Coast Reproductive, developer and manufacturer of physician-tested and physician-approved dietary supplements for men and women, has again improved its men's formula designed to enhance male fertility.† Improvements in the formula include the addition of Acetyl-L-Carnitine, Glutathione, L-Methionine, Lycopene, Relora®, and increased amounts of Coenzyme Q10, Folic Acid, Vitamin B12, Selenium and Zinc. See back panel for details.

All components are guaranteed for potency and quality and conform to the United States Pharmacopeia (USP), the official public standard-setting authority for all prescription and over-the-counter medicines and dietary supplements, for strength, purity and quality.

**Recommendations:** A three (3) month supply is recommended by physicians to complete spermatogenesis. **Dosage:** 4 capsules daily. For best results, take two capsules, two times-a-day, after meals.

## Coast MFS • Male Fertility Supplement

*Formula Improvements for better results.†*

### ACETYL-L-CARNITINE

Helps increase motility and count. Acetyl-L-Carnitine is absorbed more efficiently than L-Carnitine and reduces oxidative stress more effectively.†

### GLUTATHIONE (GSH)

Improves motility, morphology and decreases DNA fragmentation. Oral administration of Vitamin C, Vitamin E and GSH for 2 months significantly improved serum concentrations of antioxidants and relatively decreased sperm DNA damage.†

### L-METHIONINE

Increases sperm count and plays a role in sperm motility.†

### LYCOPENE

Protects against lipid and DNA oxidation.†

### RELORA®

Is a patented natural stress management ingredient. Stress exerts a profound suppression on the male reproductive system. Stress can actually reduce sperm counts and fecundity. Sperm samples provided after more stimulations and less stress yield dramatically higher motile sperm numbers.†

### VITAMIN A

A study using the combination therapy of Vitamins A, E and essential fatty acids, in infertile men, significantly improved overall pregnancy rate.†

### INCREASED PERCENTAGE VALUES OF KEY COMPONENTS

Increases in specific ingredients to meet new standards in reproductive science include:

Coenzyme Q10	+100%
Folic Acid	+100%
Vitamin B12	+150%
Selenium	+250%
Zinc	+40%
